Café Master

Tech-Driven Cafe Solution

What it Includes?

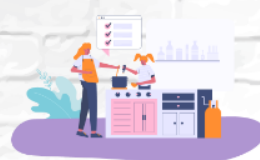

Customer Application

Customers can easily install the app, scan a table's QR code, and place their order.

Waiter Application

A tablet-based app that allows waiters to efficiently take orders and process payments.

Kitchen Display System

The kitchen team can view incoming orders, track their status, and manage the preparation process in real-time.

Kitchen Printing System

Orders are automatically printed in the kitchen as soon as they are placed, with or without the KDS.

Admin CMS

A central dashboard to manage menus, view reports, and oversee waiter activity.

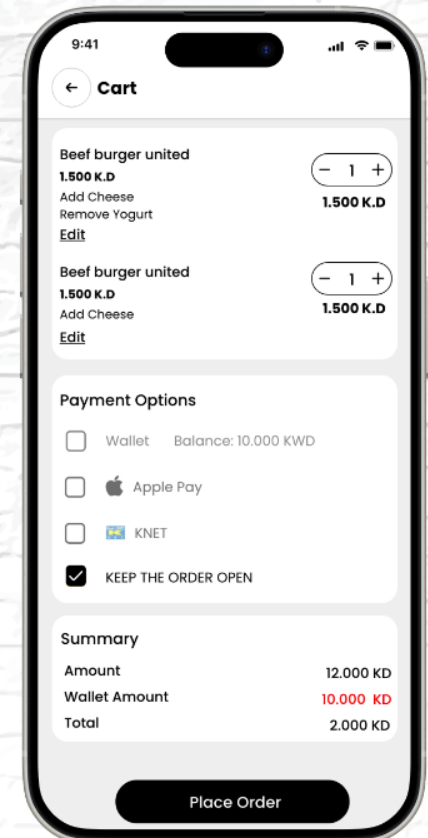

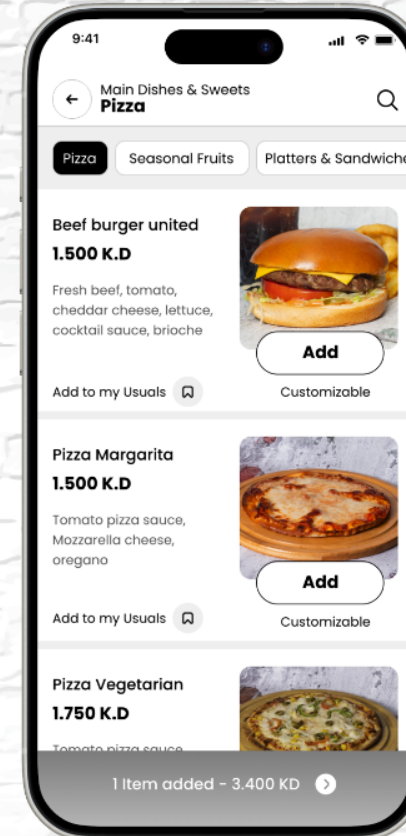

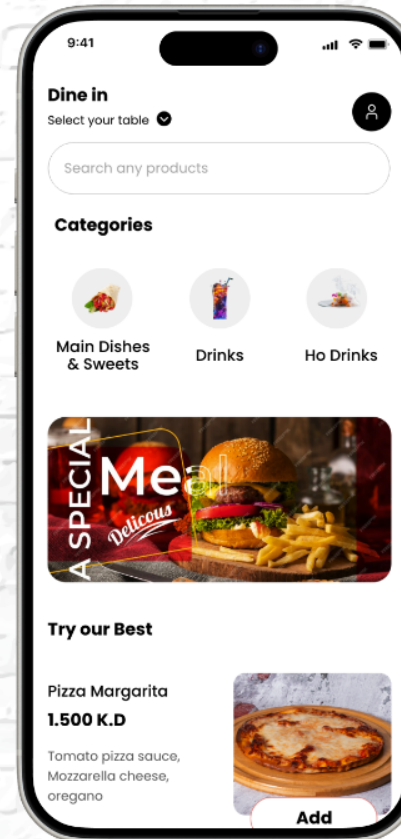

Lets Dive Deeper
